+91 8050463960 | siddharthengineer08@gmail.com | LinkedIn | GitHub | Portfolio
Industrial Engineering · Project Management · Operations & Analytics

Education

B.M.S. College of Engineering — Bengaluru, India
Bachelor of Engineering in Industrial Engineering & Management — *CGPA: 8.18 | Graduation Year: 2026*

PRISM PU Science College — Dharwad, India
PUC (Class XII) — *96% | 2021*

Experience

Supply Chain Job Simulation – GE Healthcare — Jan 2026 – Feb 2026

- Reviewed GEnx-1B engine drawings, Bills of Materials, and GD&T specifications to evaluate non-conforming components & coordinated quality disposition decisions across procurement and engineering teams.
- Maintained project traceability and compliance documentation; communicated findings clearly to stakeholders for review and follow-up.

Agentic AI Intern – Innomatics Research Labs — Feb 2026 – May 2026

- Completed a structured learning internship covering Python fundamentals, FastAPI and AI agent concepts through progressive hands-on assignments to understand how modern digital tools function.

Projects

Supply Chain & Distribution Analytics System | GitHub

- Independently scoped and managed an end-to-end 10-module supply chain project – defined the problem, broke it into deliverables, tracked progress, and delivered a working system covering 320+ orders across 8 vendor nodes.
- Applied ABC classification and moving-average forecasting to drive inventory and replenishment decisions; built a what-if simulator so planners could model lead time, freight cost, and safety stock changes before committing.

Unified Retail Intelligence Platform (URIP) – AI-Assisted Build | Live | GitHub

- Owned full project delivery from problem definition through to production – designed and shipped a retail analytics platform covering demand forecasting, inventory classification, geospatial location analysis, and facility layout planning.
- Built a unified dashboard combining KPIs, forecasts, inventory insights, and location analytics with natural-language querying; managed development using Claude, Antigravity, Gemini, and Kimi K2 as primary build tools.
- Generated automated reports for charts, tables, forecasts, and spatial insights – making complex data accessible and actionable for non-technical users.

Portfolio Website – AI-Assisted Build | Live

- Translated Stitch designs into a fully functional web application deployed on Vercel; used Antigravity and MCP to accelerate development and manage the build end-to-end without traditional coding.

Technical Skills

Project Management Fundamentals: Scope Definition, Timeline & Milestone Tracking, Stakeholder Communication, Risk Identification,CPM, Kanban, Documentation & Reporting.

Analytics & Reporting: Google Sheets, Google Workspace (Docs, Slides, Drive, Gmail), Excel (Advanced – Pivot Tables, Lookup Functions), Power BI.

AI & Productivity Tools: Claude, GPT-4, Kimi K2.5, Gemini, GitHub Copilot, Prompt Engineering.

Operations & Industrial Engineering: Process Documentation, RCA, Supply Chain Management, Lean Methodologies.

Soft Skills: Analytical Thinking, Problem Solving, Active Listening, Teamwork, Adaptability, Communication.

Certifications

- **Lean Six Sigma White Belt** – Six Sigma Council [View All]
- **SAP S/4HANA Supply Chain** – SAP
- **Job Simulations** – Supply Chain (GE Healthcare), Operations (Goldman Sachs), Business Analytics (Tata)

Additional Information

- **Languages:** English | Kannada | Hindi
- **Leadership & Events:** Volunteer Coordinator at TOPS Convention 2024 – Indian Society for Quality (ISQ) at BMSCE
- **Athletics & Interests:** State-level Karate and Badminton player; Creative Writing, Sketching & Illustration.
